KEY TECHNICAL PERSONNEL

QUALIFICATION & TECHNICAL COMPETENCY PROFILE

1. Personnel Identification

Particulars	Details
Name	Hemantha M M
Position	Software Engineer – Full-Stack Mobile & Web Application Development
Responsibility	Mobile application development (React Native), web application development (Next.js / React.js), backend API development (FastAPI), PostgreSQL data modelling, REST API and real-time (WebSocket) integration, and application deployment.
Total Professional Experience	2 years 8 months
Relevant Experience	2+ years in mobile and web application development
Current Designation & Organization	Software Engineer, Brigosha
Employment Status	Permanent

2. Professional Summary

Full-Stack Developer with 2+ years of experience in mobile (React Native) and web (Next.js / React.js) application development. Experienced in mobile frontend architecture, state management (Redux, Context API), backend API development using FastAPI and PostgreSQL, and real-time features using WebSockets (Socket.io). Currently working at Brigosha on the Aulas education platform application. Previous experience at Infanion Software Solutions includes a neighbourhood communication mobile application and an internal employee benefits platform, delivered from concept to deployment in Agile environments.

3. Educational Qualifications & Professional Certifications

Qualification / Certification	Specialisation	Institution / Issuing Body	Year
B.E.	Computer Science	Channabasaveshwara Institute of Technology	2023 (CGPA 8.1/10)
Java Full Stack Certification	Full-Stack Java Development	Pentagon Space	Not specified

4. Technical Competency Matrix

Technical Area	Specific Skills / Tools / Technologies	Experience (Years)	Proficiency / Evidence
Software / Application	React Native, Next.js, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3; mobile and web application development	2+ years	Advanced / hands-on mobile and web application development across Infanion and Brigosha projects.
Mobile Development	React Native (iOS / Android), React Navigation, Axios, Firebase	2+ years	Delivered cross-platform mobile apps with full deployment lifecycle management.
State Management & UI	Redux, Context API, Tailwind CSS, responsive design	2+ years	State management and responsive UI implementation across mobile and web projects.
Backend & Data	FastAPI, PostgreSQL, SQL, RESTful API development	Project-based (since 11/2025)	Engineered API endpoints and designed PostgreSQL data models for an internal full-stack platform.
Real-time Communication & APIs	WebSockets (Socket.io), REST API integration	Project-based	Implemented a real-time notification system and real-time features in mobile applications.
Tools & Platforms	Git, Firebase, Agile methodology	2+ years	Used in source control and Agile delivery workflows.

5. Project/Prior Experience(s)

Project Particulars	Details
Project Name & Client	Aulas – Education Platform Application
Organisation	Brigosha
Project Duration	05/2026 – Present
Project Description	Development of the Aulas education platform application for digital learning and education-related workflows. Further details about modules, user groups and deployment scale can be

Project Particulars	Details
	added when confirmed.
Technology / Systems Used	Mobile and web application development technologies including React Native, React.js, JavaScript and TypeScript; REST API integration. Confirm which of these are used specifically on this project.
Role in Project	Software Engineer
Specific Technical Contributions	Working as a Software Engineer on application development, including mobile application features, UI implementation and API integration. Specific modules and individual deliverables can be added when confirmed.
Project Outcome	Contributing to the development of the Aulas education platform by delivering application features and integrations, supporting usability, maintainability and application performance.
Relevance to Present Tender	Relevant experience in developing mobile and web applications, UI components and API integrations for a live platform.

Project Particulars	Details
Project Name & Client	Mymmo – Neighbourhood Communication Platform
Organisation	Infanion Software Solutions Pvt. Ltd.
Project Duration	During employment: 03/2024 – 11/2025 (Mobile Engineering Focus)
Project Description	Cross-platform (iOS / Android) neighbourhood communication mobile application enabling information exchange across communities.
Technology / Systems Used	React Native, WebSockets, REST APIs, Redux / Context API, Firebase.
Role in Project	Associate Software Engineer – Mobile
Specific Technical Contributions	Architected the mobile frontend architecture; implemented the real-time notification system using WebSockets; integrated REST APIs; managed the application lifecycle from concept and design through deployment and ongoing maintenance.
Project Outcome	Application deployed on iOS and Android with real-time notification functionality, as stated in the supplied resume.
Relevance to Present Tender	Demonstrates end-to-end mobile application development, real-time communication, API integration and deployment.

Project Particulars	Details
Project Name & Client	Internal Employee Benefits Platform
Organisation	Infanion Software Solutions Pvt. Ltd.
Project Duration	During employment: 11/2025 – 04/2026 (Full-Stack Development Focus)
Project Description	Internal full-stack platform for employee benefit points management and redemption, developed in an Agile environment.
Technology / Systems Used	Next.js, FastAPI, PostgreSQL, RESTful APIs.
Role in Project	Associate Software Engineer – Full Stack (development lead)
Specific Technical Contributions	Led development of the platform; designed and engineered the end-to-end points management and redemption system; engineered complex API endpoints and backend logic; defined the PostgreSQL data model for scalability and reliable transaction handling.
Project Outcome	Improved internal user experience and streamlined administrative processes for benefits management, as stated in the supplied resume.
Relevance to Present Tender	Demonstrates full-stack development, backend API design, database modelling and transaction handling.

6. Additional Technical Strengths

Area	Details
Standards / Protocols	RESTful APIs, WebSockets (Socket.io), Firebase services (as stated in supplied resume).
Quality & Process Exposure	Agile delivery, source control with Git, scalable data modelling and application architecture design.
Testing / Deployment Exposure	Full deployment lifecycle management for cross-platform React Native apps (iOS / Android), including ongoing maintenance.
